Welcome to my website!
As a creative entrepreneur, I am excited to share my passion for coding, photography, and art with you. I have always been fascinated by the intersection of these disciplines and how they can be combined to create unique and innovative products.

Through my work, I aim to develop one-of-a-kind products that showcase the beauty and artistry of both the digital and physical world. I believe that technology can be used to enhance and elevate traditional forms of art, such as photography and painting, and I am dedicated to exploring these possibilities.

With a strong foundation in coding and web development, I am able to bring a technical expertise to my work that allows me to create dynamic and interactive websites, as well as other digital products. Through my photography and art, I am able to bring a unique perspective and aesthetic to my designs.

My goal is to work closely with my clients to develop products that meet their individual needs and showcase their personal style. Whether it's a custom website design or a unique piece of art, I am committed to delivering high-quality, personalized products that exceed expectations.

Thank you for visiting my website, and I look forward to the opportunity to collaborate with you on your next project.

About Me

About

I am a young creative who has found his love for coding after many years in varying fields. I have a love for the creative arts and culture, and I have found this to be a big influence on my work as a full-stack developer. My broad skillset and background in other fields has given me a deeper understanding of how I can create functional, accessible and compliant software, programs and web content for my clients. On top of this I find these skills to be of great value when consulting on projects within other fields such as Construction and Health & Fitness. When I am not working doing development work, I enjoy spending my time outdoors climbing, playing guitar, photography and editing, painting, playing board games/video games or strength training.

A wide-angle photograph of a glacier lagoon, likely Jökulsárlón in Iceland. The foreground is filled with dark, smooth stones and ice floes. In the middle ground, several large, jagged icebergs of various sizes float on the water. The background features a range of mountains, their peaks partially obscured by low-hanging clouds. The overall color palette is dominated by shades of blue and grey, reflecting the cold environment.
